

CLEANING GUIDANCE FOR LOCKS AND ACCESSORIES

-
- Mist with 70-80% alcohol, leave on for at least 30 seconds to ensure area is disinfected
 - Isopropyl alcohol or rubbing alcohol with at least 70 percent alcohol – undiluted – will kill coronavirus on surfaces in about 30 seconds.
 - When you soak a virus in alcohol – in this case ethanol or isopropanol – and let it air dry, the alcohol breaks down the fatty bilayer that holds the virus together.
